

a**One table, two readings**

as stated: minimise

the objective the prompt gives
opp. B opp. A

B	2 BB	10 BA
A	0 AB	6 AA

same
numbers

as read: maximise

the canonical reward-framed dilemma
opp. B opp. A

B	2 BB	10 BA
A	0 AB	6 AA

told cooperative → **Option B**

mutual B costs 2, mutual A costs 6

told selfish → **Option A**

A dominates; exploiting costs 0

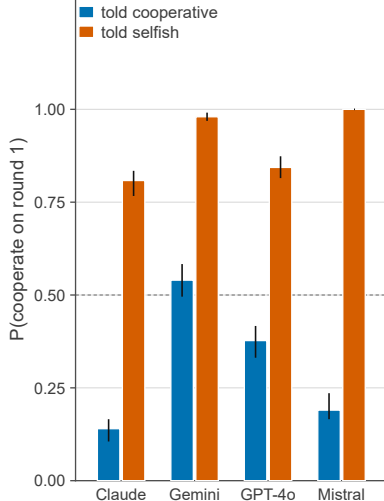

told cooperative → **Option A**

mutual A pays 6, mutual B pays 2

told selfish → **Option B**

only B can reach the 10

every predicted action inverts between the two readings

b**Prediction 1: the opening inverts****c****Prediction 2: repeat the 10, abandon the 0**
