

**a**

What a game actually earns

In a the bar is the interquartile range and the open circle the median. The open markers in b are a control: agents 1 and 2 of a matched pairing are given identical prompts, so that interval should straddle zero. For Claude and Gemini it does not, which is a position artefact rather than a result about personas -- FR17a audits it directly.

**b**

Who profits, 95% CI
